- 2026 In Defense of the Damned**
First day starts 6pm- last day ends 12pm (MST)
In Defense of the Damned- a specialty course focused solely on applying the TLC Method to criminal defense cases.
Take your level of defending those who seem to be "damned" by society and the justice system to a higher level of advocacy in trial. The TLC Method for Cross Examination trains trial lawyers to apply the psychodramatic methods that improve listening skills and therefore the ability to understand and empathize with everyone in the courtroom, including opposing witnesses.

Transform the Way You Tell Your Case
This program is exclusively designed for graduates of the Trial Lawyers College—lawyers who have already demonstrated a deep commitment to authentic, human-centered advocacy. You come to this experience not as beginners, but as engaged students of psychodrama who are ready to refine, deepen, and elevate your craft.
Building on the powerful foundation you developed at the College, this advanced seminar is designed to take your knowledge of and training in psychodrama to the next level. Through intensive, experiential work, you will push beyond technique into mastery—learning to access deeper emotional truth, sharpen your narrative instincts, and connect with even greater clarity, courage, and authenticity.
Among peers who share your training, language, and dedication, you will be challenged, supported, and inspired to expand what is possible in your case work by telling your own story first.

Daubert is not Just a Shield - Webinar with Andy Delaney
Zoom

12pm PT/1pm MT/2pm CT/3pm ET

Special TLC 1-hour Webinar (lecture-format) by Andy Delaney. Daubert is not just a shield; it is a sword. TLC-eligible plaintiff and criminal defense lawyers do not have to sit back and wait for the usual defense or prosecution Daubert strike. The same gatekeeping rules that have been used for years to attack our experts apply with equal force to theirs. By mastering Daubert and its progeny (often codified in Rule 702), you can flip the script: expose result-driven opinions, analytical gaps, junk methodologies, and experts wandering outside their lane, then move to exclude or tightly limit that testimony before a jury ever hears it. When the motion lands, the tables turn—suddenly the hospital has no causation expert, or the state's star forensic witness is sidelined or boxed into a tiny corner. This webinar will focus on how TLC-style story, cross, and emotional truth combine with Daubert's technical framework to take away the other side's "science" and put you in the strongest possible trial position.
